

Innovation & Collaboration To Enable Future Smart Cities

Connected Technology / Innovation Where Roads & Urban Air Meet To Benefit Our Society

**Increasing safety & efficiency e.g. blue light services,
infrastructure maintenance**

Reducing CO2 emissions

Delivering social benefits e.g. faster medical sample transport

Reducing ground transport congestion

Reducing costs of logistics deliveries

Creating new business & job opportunities

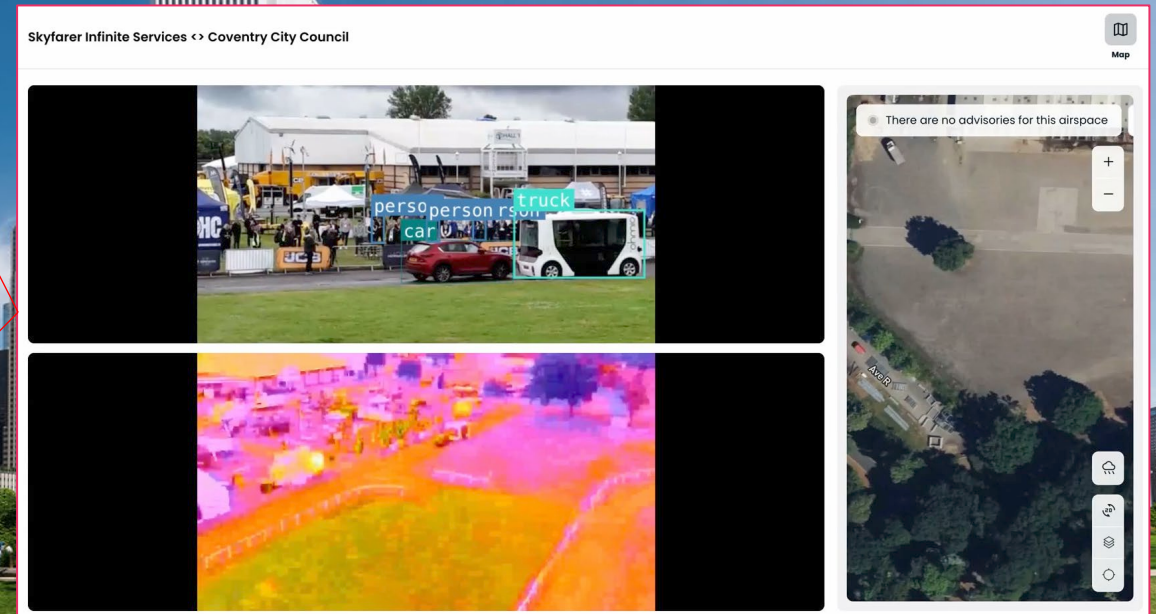

Collaborating Technology / Innovation

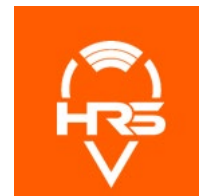

- National Highways
- Local Authorities, Transport Authorities, Urban Planners
- Manufacturers / OEM's
- Developers
- Civil Aviation Authorities
- Communication Providers.
- Creating new business & job opportunities

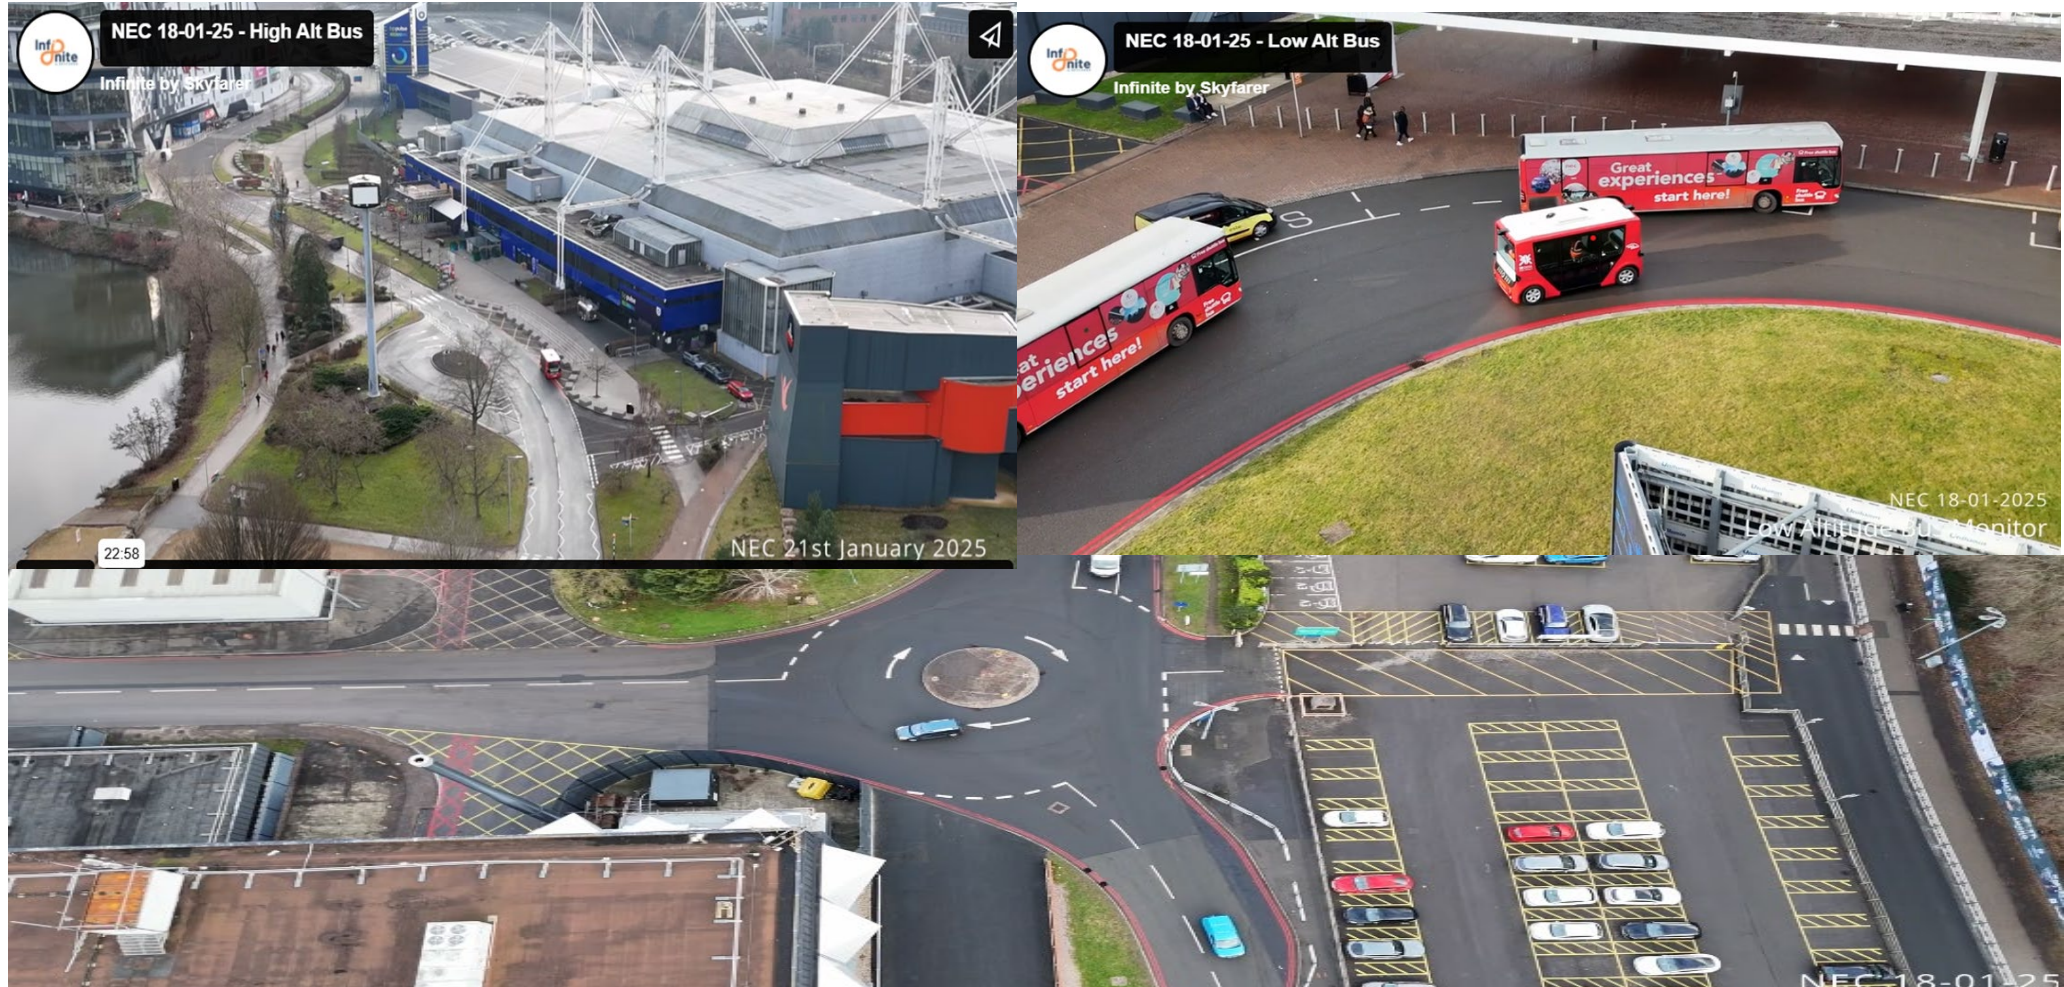

Live Demonstration of E-Call with Drone Assistance

Collaborating Partners For The Demonstration

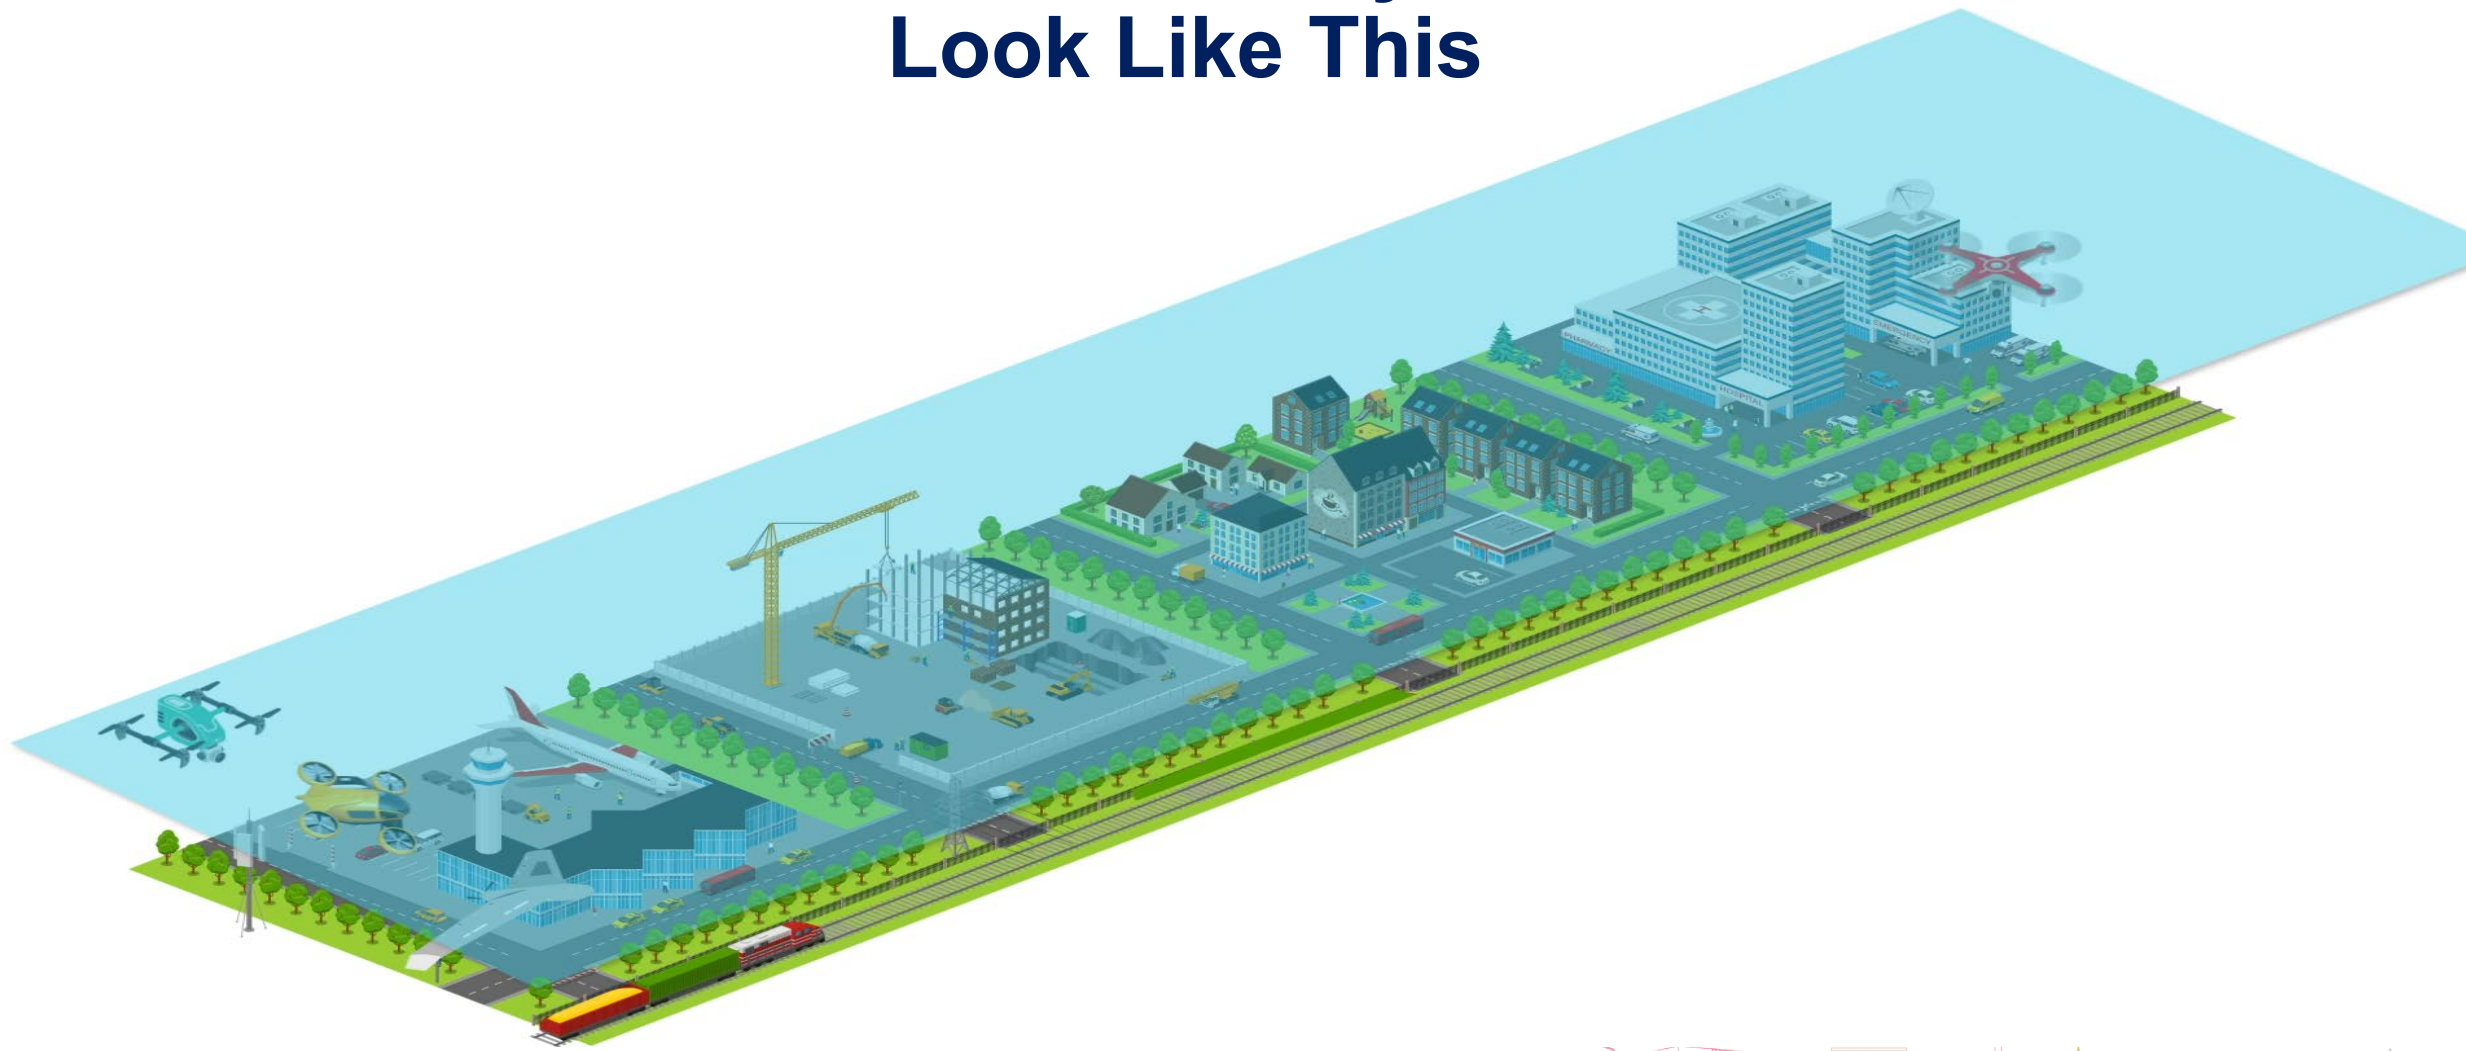

Future Road / Air Transport

Could This Be The Start to Introducing “VERTPORTS” in Our City?

Could Our Future City Road / Air Look Like This

“The Use of Technology When Applied to Transport”

Traffic Management | Enforcement | Mobility as a Service |
Smart Ticketing | Demand Responsive Transport | Apps |
Data | Connected and Autonomous Vehicles | Integrated
Transport | Digital Twins | Predictive maintenance | Mobility
Pricing etc
